

Same numbers. Drawn twice.

Both charts are about how much the Prep buddies liked each stall. Both use exactly the same two numbers. Nobody has made anything up.

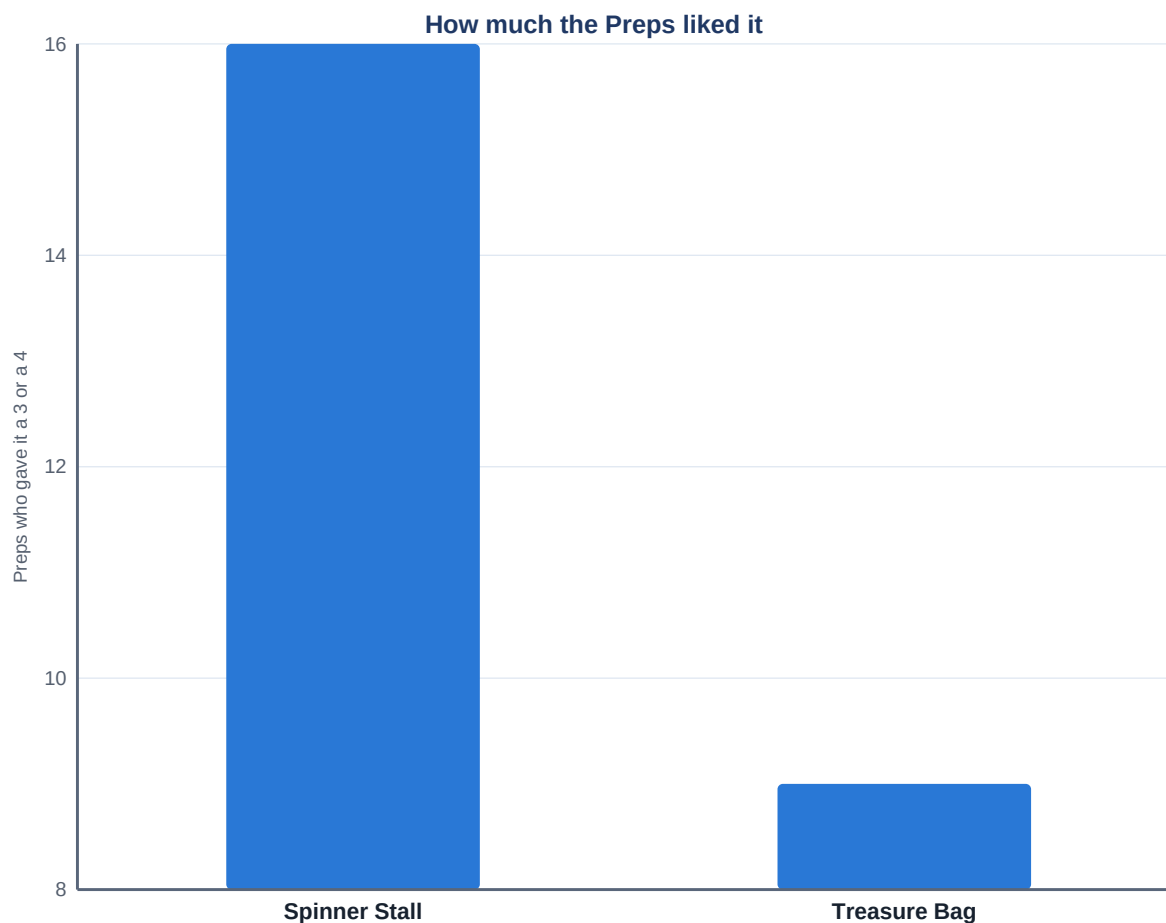

Which one is lying?

Look at the numbers up the left-hand side of each one.

THE SPINNER STALL 8 TIMES MORE PREPS LOVED OUR STALL!

Buddy Games Day · Riverbend State School newsletter

Every number on this chart is correct. We counted them ourselves.

— The Spinner Stall team

Chart 2

6 TIMES MORE PREPS
WON A PRIZE AT OUR STALL!

The Spinner Stall strikes again

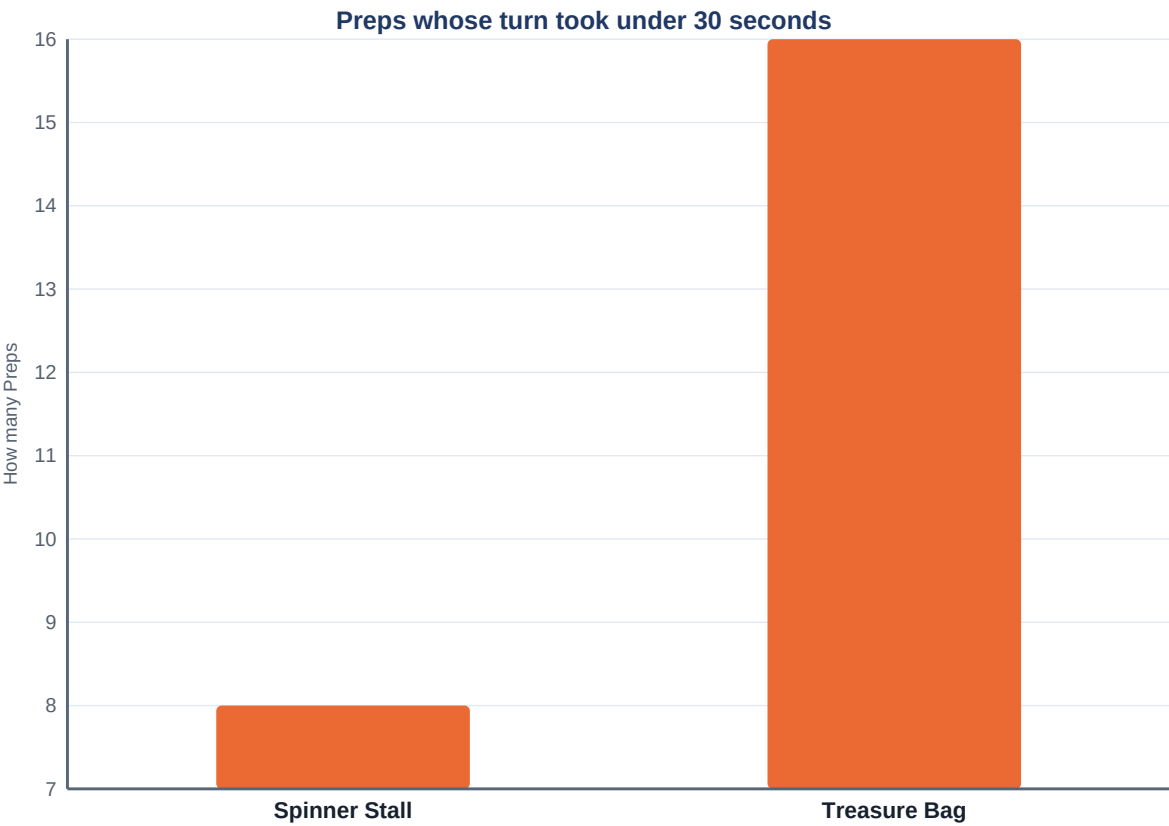

The real numbers	Spinner Stall	Treasure Bag
Preps who won at least one prize	18	13
Preps altogether	20	20

Chart 3

9 TIMES MORE PREPS
GOT A QUICK TURN AT OURS!

The Treasure Bag answers back

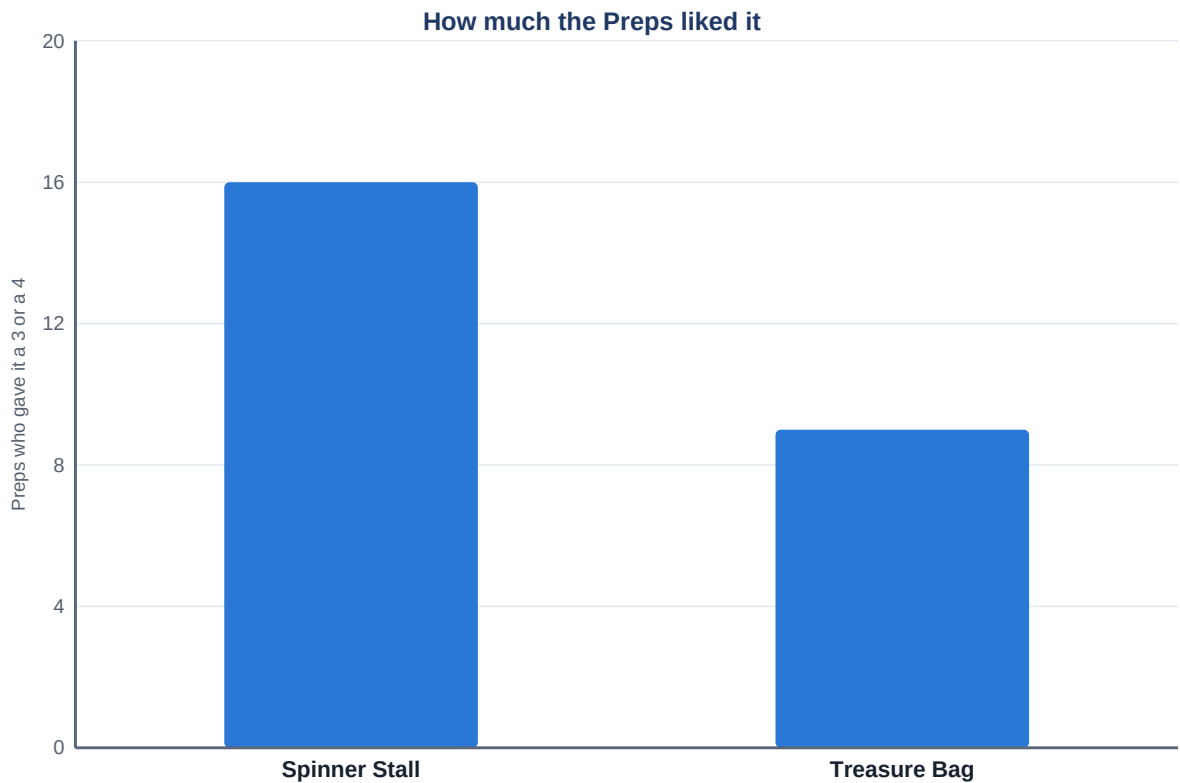

The real numbers	Spinner Stall	Treasure Bag
Turns under 30 seconds	8	16
Preps altogether	20	20

The same poster, drawn honestly

Same two numbers. The only change is that the axis starts at zero — so the length of each bar is now worth what it says.

NEARLY TWICE AS MANY PREPS
LOVED THE SPINNER STALL

True, clear, and still worth putting on a poster

Three questions, every chart

1. Where does the axis start?
2. Do the steps go up evenly?
3. Does the headline match the numbers?
